

## Multiplication air hockey activity

**You will need:** kitchen paper tubes cut in half, circles made from card with multiples written on front and back, felt pen and an empty squeeze bottle or straw. Cut out small gap at base of tube for disc to fit through.

You can play this game three ways.

1. By squeezing the bottle to blow the disc into the corresponding tube.

2. By blowing through a straw to move the disc into the tube.

3. By picking up the disc and dropping it into the top of the tube.
